DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-32, drawn to a method of relieving congestion in a packet-based network that interconnects a plurality of peripheral networks by implementing corrective actions in said peripheral networks, said peripheral network each comprising a plurality of gateway nodes having data to be transferred therebetween, and utilizing a concept of virtual pipelines between said gateway nodes, classified in class 370, subclass 235.
 - II. Claims 33-48, drawn to a method of relieving congestion in a packet-based network that interconnects a plurality of peripheral networks by implementing corrective actions in said peripheral networks, said packet-based network comprising a plurality of nodes through which call pass, said plurality of nodes including gateway nodes through which calls enter said packet-based network from said peripheral networks and exit said packet-based network to said peripheral networks, classified in class 370, subclass 401.
2. The inventions are distinct, each from the other because: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as identifying a first set of virtual pipelines for which traffic exceeds a predetermined threshold while invention II also has separate utility such as identifying a set of

pairs of gateway nodes contributing traffic to individual ports of said packet-based network that are experiencing congestion above a predetermined threshold. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Theodore Naccarella on July 21, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
